EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas E. Spath on September 26, 2006 to cancel claims 10 and 20 in order to place the application in condition for allowance as these claims were seen as met by the cited prior art.

The application has been amended as follows:

Cancel claims 10 and 20.

Reasons for Allowance

2. Claims 1-9 and 11-19 are allowed.
3. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of the claims is the combination of a minimum travel position of a valve controlling flow in a controllable process with inputting a control signal with increasing the value of the control signal input through a series of operating points with generating a graphical straight line generated that is fitted between a minimum travel position and highest travel position.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Irokawa, Kawai, Philbin, Lange and Hansen disclose valves that control fluid flow in a controllable process.
